

# Green Statement

The ComfortDelGro Group of Companies aims to minimise the impact of its activities on the Environment by ensuring continuous improvement in environmental performance whilst bearing in mind prevailing technical and operational constraints. The Group is also committed to complying with all statutory and regulatory requirements.

Our overall goal in environmental management is to minimise the harmful effects of our operations across Singapore, United Kingdom, Ireland, China, Australia, Vietnam and Malaysia on the environment. By striving to reduce the environmental footprint of each passenger journey, ComfortDelGro can contribute to reductions in air pollution from road transport and carbon dioxide emissions. A complete elimination of harmful emissions is, however, not possible and we will explore how best we can offset any negative impact we have on the environment.

We endeavour to continue to improve the management of our environmental impact by reducing resource usage and minimising waste. We will continue to make ongoing investments in new vehicles so as to reduce our emissions profile. We will also continue to support research into alternative fuels.

In the longer term, our environmental goals are:

- To improve our emissions profile per passenger journey or per passenger kilometre;
- To reduce the output of waste and to increase the proportion of waste reused/recycled;
- To improve the environmental management standards across the Group;
- To continue to encourage and promote the use of public transport so as to ensure a modal shift away from car use;
- To continue to support initiatives on research and trial the use of alternative fuels.
