F. NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

1. CORPORATE INFORMATION

ComfortDelGro Corporation Limited (the Company) is incorporated in the Republic of Singapore with its registered office and principal place of business at 205 Braddell Road, Singapore 579701. The Company is listed on the Singapore Exchange Securities Trading Limited. These condensed interim consolidated financial statements as at and for the six months ended 30 June 2022 comprise the Company and its subsidiaries (collectively, the Group).

The principal activities of the Company are those of investment holding and the provision of management and shared services. The principal activities of the Group are described in Note 4.

2. BASIS OF PREPARATION

The condensed interim financial statements as at and for the six months ended 30 June 2022 have been prepared in accordance with SFRS(I) 1-34 Interim Financial Reporting. The condensed interim financial statements do not include all the information required for a complete set of financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group's financial position and performance of the Group since the last annual financial statements for the year ended 31 December 2021.

The accounting policies adopted are consistent with those of the previous financial year which were prepared in accordance with SFRS(I)s, except for the adoption of new and amended standards as set out in Note 2.

The condensed interim financial statements are presented in Singapore dollar which is the Company's functional currency and all values are expressed in million (\$'m) except when otherwise indicated.

2.1. New and amended standards adopted by the Group

A number of amendments to Standards have become applicable for the current reporting year. The Group did not have to change its accounting policies or make retrospective adjustments as a result of adopting those standards.

2.2. Use of judgements and estimates

In the application of the Group's accounting policies, Management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. Management is of the opinion that any instances of applications of judgements are not expected to have a significant effect on the amounts recognised in the Financial Statements (apart from those involving estimations, which are dealt with below).

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying the Group's accounting policies

The following are the critical judgements, apart from those involving estimates (see below), that Management has made in the process of applying the Group's accounting policies and that have a significant effect on the amounts recognised in the Financial Statements:

Provision for rail contract

As the COVID-19 pandemic is still on-going, the timing of the recovery of travel and economic activities to pre-COVID-19 levels is uncertain and there could be significant shifts in ridership patterns and fare adjustments. In projecting the future financial performance of the Downtown Line, North East Line and Sengkang Punggol LRT under the Consolidated Rail Licence of SBS Transit Ltd ("SBST"), significant judgement is exercised in key assumptions relating to ridership, fare adjustments and availability of grants from the Authorities, taking into consideration the timing of the recovery of travel and economic activities to pre-COVID-19 levels. Based on SBST's Management's assessment, no provision for rail contract is required. Accordingly, the Group has not made provision on that basis.

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Provisions

(i) Accident claims

Claims for property damage and personal injury are provided in the Financial Statements based on the claims outstanding as of the end of the financial year and estimated amounts payable. The past claims history and payment trends are used as a basis to estimate the amounts in which the Group will have to pay to third parties for such claims. The provision for accident claims as at 30 June 2022 is \$41.9m (31 December 2021: \$44.3m).

Impairment review of taxi vehicles, taxi licences, goodwill and investment in subsidiaries

The Group tests goodwill and taxi licences with infinite useful lives for impairment annually, or more frequently if there are indications that they might be impaired. Impairment assessment is also performed for taxi vehicles and taxi licences with finite useful lives when there is an impairment indication. The Company assess any indicator for impairment for investments in subsidiaries annually, or more frequently if there are indications that they might be impaired.

Determining whether taxi vehicles, taxi licences, goodwill and investment in subsidiaries are impaired requires an estimation of the value in use of the cash-generating units ("CGUs") to which subsidiaries, taxi vehicles, taxi licences and goodwill have been allocated. The value in use calculation requires the entity to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. A provision for impairment loss on taxi vehicles, taxi licences, goodwill and investment in subsidiaries is recognised in Profit or Loss and can be reversed in the subsequent period except for goodwill when the amount of impairment loss decreases.

The recoverable amounts of the CGUs are determined from value in use calculations. The key assumptions for the value in use calculations are those regarding the discount rates, growth rates and expected changes to profit margins during the period.

The Group and the Company prepare cash flow forecasts derived from the most recent financial budgets approved by Management for the next year and extrapolates cash flows based on estimated growth rate. The estimated terminal growth rate does not exceed the average long-term growth rate for the relevant markets and countries in which the CGU operates.

No indicators of impairment were identified as at 30 June 2022. Accordingly, no provision for impairment was made for taxi vehicles, taxi licences, goodwill and investment in subsidiaries for the half year ended 30 June 2022.

Allowance for inventory obsolescence

The Group's inventories comprised mainly parts, accessories and consumable stock required for the operation and maintenance of vehicles and equipment.

The terms of the rail licence contract and useful life of buses are considered in the determination of the useful life of the inventories. In addition to identification of obsolete inventories based on considerations such as phasing out of vehicle models and inventories purchased for specific projects which have ended, Management identifies inventories that are slow moving and evaluates the carrying value of inventories. An allowance for inventory obsolescence is recognised for these inventories based on its useful life and inventory turnover.

Useful lives of vehicles, premises and equipment

The Group reviews the estimated useful lives of vehicles, premises and equipment at the end of each annual reporting year. Management determined that the estimated useful lives of vehicles, premises and equipment are appropriate.

3. SEASONAL OPERATIONS

The Group's businesses are not affected significantly by seasonal or cyclical factors during the financial period.

4. SEGMENT AND REVENUE INFORMATION

Information reported to the Group's chief operating decision maker for the purposes of resource allocation and assessment of segment performance is organised on a world-wide basis into 7 major operating divisions:

- a) Public transport services: Income is generated substantially from the provision of bus and rail services to commuters travelling on public transport systems, contracted revenue for operation of scheduled services, provision of coach rental services, provision of non-emergency transport services to patients and ancillary advertisement income.
- b) Taxi: Income is generated through renting out taxis, operating taxi bureau services and ancillary advertisement income.
- c) Automotive engineering services: Income is generated through provision of vehicular maintenance and repair services, construction of specialised vehicles, assembly of bus bodies, crash repair services, engineering services and sale of diesel and petrol and electric vehicle charging infrastructure.
- d) Inspection and testing services: Income is generated through the provision of motor vehicle inspection services and provision of non-vehicle testing, inspection and consultancy services.
- e) Driving centre: Income is generated through operating driving schools.
- f) Car rental and leasing: Income is generated through renting and leasing of cars.
- g) Bus station: Income is generated mainly through commission income from fare collection.

Segment revenue and expenses: Segment revenue and expenses are the operating revenue and expenses reported in the Group's Income Statement that are directly attributable to a segment and the relevant portion of such revenue and expenses that can be allocated on a reasonable basis to a segment.

Segment assets and liabilities: Segment assets include all operating assets used by a segment and consist principally of operating receivables, inventories, intangible assets, goodwill, vehicles, premises and equipment, right-of-use assets, net of allowances and provisions. Capital additions include the total cost incurred to acquire vehicles, premises and equipment and intangible assets directly attributable to the segment. Segment liabilities include all operating liabilities and consist principally of trade payables, accruals, deferred grants, deposits, provisions, lease liabilities from financial institution and lease liabilities.

Inter-segment transfers: Inter-segment revenue and expenses include transfers between business segments. Inter-segment sales are based on prices as determined between the parties. These transfers are eliminated on consolidation.

4.2 Revenue

The Group has the right to consideration from customers in amounts that correspond directly with the performance of the services completed.

Included in the revenue from transport services are performance incentives from transport regulators for achieving certain performance and service quality targets. These performance incentives accounted for approximately 2% (1H2021: 2%) of the total revenue.

Out of the total revenue, 87% (1H2021: 89%) is recognised over time, largely contributed by Public Transport Services, Taxi and Car Rental and Leasing segments. The revenue arising from the remaining segments are recognized at a point in time. Please refer to Note 4.1(i) for further details.

Analysed as:				
- Non-current	26.7	27.7	9.5	<u>11.7</u>

The equity shares in corporations represent investment for long-term strategic purpose.

The Group classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- a) quoted prices in active markets for identical assets or liabilities (Level 1);
- b) inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly (Level 2); and
- c) inputs for the asset or liability that are not based on observable market data (Level 3).

The majority of the fair value of the Group's investments is classified into Level 1. The Group's hedging instruments, if any, are classified into Level 2. Fair value of the financial instrument classified in Level 3 is insignificant. There are also no transfers between Levels 1 and 2 of the fair value hierarchy during the financial period.

Of the carrying amount of \$214.6m (31 December 2021: \$220.0m) is \$195.8m (31 December 2021: \$200.3m) of taxi licences in China and \$7.8m (31 December 2021: \$8.4m) of rights under contract and brands in the United Kingdom with indefinite lives. These taxi licenses, rights under contract and brands are not amortised because there is no foreseeable limit to the cash flows generated.

The remaining balance of \$11.0m (31 December 2021: \$11.3m) mainly relates to \$5.6m (31 December 2021: \$5.7m) of rights under contract in Australia, \$1.5m (31 December 2021: \$1.7m) of brands in the United Kingdom, \$0.6m (31 December 2021: \$0.6m) of taxi licences in China and \$2.5m (31 December 2021: \$2.2m) of software development costs in Singapore with finite useful lives over which the assets are amortised. The useful lives of intangible assets are ranging from 2 to 15 years (31 December 2021: 2 to 15 years).

Goodwill arose in the acquisition because the consideration paid for the combination included amounts in relation to the benefit of expected synergies, revenue growth, future market development and the assembled workforce. These benefits are not recognised separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets. The finalisation of the goodwill amount is dependent on the completion of the valuation of net assets acquired. None of the goodwill arising from these acquisitions is expected to be deductible for tax purposes.

18. SUBSEQUENT EVENTS

There are no known subsequent events which have led to adjustments to this set of condensed financial statements.

On 12 July 2022, ComfortDelGro Irish Citylink Limited, an indirect, wholly-owned subsidiary, entered into a sales and purchase agreement with Cummer Bus Group Limited (the "Seller") to purchase the entire stake in Evobus and Coach Limited ("Evobus") and a fleet of 31 buses from the Seller and its subsidiaries (the "Transaction") at a consideration of €12 million (approximately S\$17.52 million). The Transaction will allow the Group to expand its intercity coach services in Ireland. Completion of the acquisition of the entire issued share capital of Evobus took place on the same day, i.e. on 12 July 2022. Completion of the acquisition of the fleet of 31 buses is expected to take place at the end of a transitional services period of approximately one month.

On 29 July 2022, the two agreements in the announcement dated 14 December 2021 in relation to the acquisition by the Group's wholly-owned subsidiary Braddell Limited ("Braddell") of shares of Scottish Citylink Coaches Limited ("SCCL") and the acquisition by SCCL of certain business assets relating to the retail and customer services operations for the marketing and sale of coach journeys have been terminated following negotiations.

On the same day, i.e. 29 July 2022, a business purchase agreement was entered into between (i) SCCL, (ii) Stagecoach Group plc, (iii) Stagecoach Services Limited, (iv) Midland Red (South) Limited, (v) Stagecoach Bus Holdings Limited ("Stagecoach Bus Holdings"), (vi) Stagecoach Devon Limited ((ii) to (vi) shall be collectively referred to as the "Sellers") and (vii) Braddell, for the acquisition by SCCL of the businesses and business assets relating to the retail and customer services operations carried on by the Sellers for the marketing and sale of coach journeys (a) within the UK under the 'megabus' brand; and (b) between Plymouth and Bristol under the 'Falcon' brand for a consideration of £1.7million (approximately S\$2.8 million) which will be satisfied by the allotment and issuance of 65,733 shares of SCCL to Stagecoach Bus Holdings. Braddell's shareholding in SCCL will decrease from 65% to 62.5% while Stagecoach Bus Holdings' shareholding in SCCL will increase from 35% to 37.5%. Completion of the acquisition will give the Group the opportunity to extend its experience of operating intercity coaches into England and Wales and is expected to take place in August 2022.

1. REVIEW

The condensed interim financial statements have not been audited or reviewed.

2. REVIEW OF GROUP PERFORMANCE

Performance Review

The Group's financial performance in 1H2022 improved compared to 1H2021 as COVID-19 restrictions continued to relax across major economies and nation, except for China which continued with its "Zero-COVID" policy and faced further lockdowns in 1H2022. Improved economic activity levels in Singapore, Australia and UK were partially offset by reduced Government Reliefs which had been tapering off throughout 2021. Inflationary pressures were so far mitigated by relevant indexations.

Group Revenue of \$1,859.9m for 1H2022 was \$117.4m or 6.7% higher compared to \$1,742.5m for 1H2021 with the increase of \$150.4m coming from underlying businesses partially offset by an unfavourable foreign currency translation of \$33.0m from the weaker A\$ and £.

Group Operating Costs of \$1,684.3m for 1H2022 was \$76.4m or 4.8% higher compared to \$1,607.9m for 1H2021 with the increase of \$105.9m coming from the underlying businesses partially offset by a favourable foreign currency translation of \$29.5m from the weaker A\$ and £. Group Operating Costs were higher in line with increased revenues and reduced COVID-19 government reliefs.

Group Operating Profit of \$175.6m for 1H2022 was \$41.0m higher compared to \$134.6m for 1H2021 with \$44.5m from underlying businesses partially offset by a net negative impact from the foreign currency translation of \$3.5m.

Net Income from Investments of \$4.0m for 1H2022, which was mostly related to interest income on short-term deposits and bank balances, increased by \$0.8m or 25.0% compared to \$3.2m for 1H2021 due to higher deposit rates.

Finance Costs of \$4.9m for 1H2022 decreased by \$1.0m or 16.9% from \$5.9m for 1H2021 mainly due to the lower interest expense in Australia and the UK after the repayment of borrowings.

Share of results of associates and joint ventures increased by \$0.5m for 1H2022 mainly from newly acquired shares in Auckland One Rail Limited ("AOR") as operations commenced in January 2022.

Consequently, Group Profit before Taxation of \$175.2m for 1H2022 was \$43.3m or 32.8% higher compared to \$131.9m for 1H2021.

Taxation for the Group of \$36.1m for 1H2022 was \$11.8m or 48.6% higher compared to \$24.3m for 1H2021 mainly due to higher taxable profits and lower tax-exempt Government reliefs.

Group Profit after Taxation of \$139.1m for 1H2022 was \$31.5m or 29.3% higher than the \$107.6m for 1H2021.

Group Profit attributable to Non-Controlling Interests of \$20.4m for 1H2022 increased by \$3.8m or 22.9% compared to \$16.6m for 1H2021 due to higher profits from subsidiaries with non-controlling interests.

Group Profit attributable to Shareholders of the Company of \$118.7m for 1H2022 was \$27.7m or 30.4% higher compared to \$91.0m for 1H2021.

Revenue from the Group's **Public Transport Services Business** of \$1,486.1m for 1H2022 was \$111.9m or 8.1% higher than the \$1,374.2m for 1H2021 due mainly to improved rail ridership and fuel indexation in Singapore. Operating Profit of \$122.8m for 1H2022 was \$40.3m or 48.8% higher than the \$82.5m for 1H2021 mainly due to higher revenues and net gain on disposal of Alperton property in London in 1H2022, partially offset by higher operating costs mainly from higher fuel & electricity expenses as well as lower COVID-19 government reliefs.

Revenue from the Group's **Taxi Business** of \$211.3m for 1H2022 was \$14.6m or 6.5% lower compared to \$225.9m for 1H2021 due to various lockdowns in China and the absence of contributions from the London and Ho Chi Minh taxi businesses following their divestments in July 2021 and March 2022. The drop was partially offset by an increase in revenue from the Singapore Taxi business which benefitted from the relaxation of COVID-19 measures. Operating profit of \$21.2m for 1H2022 was \$3.3m or 18.4% higher than the \$17.9m in 1H2021 mainly due to the increase in Singapore Taxi business revenue while lower China and UK revenues were partially offset by lower operating costs.

Revenue from the Group's **Automotive Engineering Services Business** of \$100.1m for 1H2022 was \$14.6m or 17.1% higher than the \$85.5m for 1H2021 mainly from higher fuel sales and volume in 1H2022. Operating Profit of \$4.7m for 1H2022 was \$0.9m or 16.1% lower than the \$5.6m as fuel sales pump price adjustments lagged oil price increases and lack of government reliefs which ended in 2021.

Revenue from the Group's **Inspection and Testing Services** Business of \$53.3m for 1H2022 was \$4.2m or 8.6% higher than the \$49.1m for 1H2021 mainly due to recovery in activity levels for non-vehicles testing. Operating Profit of \$16.5m for 1H2022 was \$1.3m or 8.6% higher than the \$15.2m for 1H2021 mainly due to higher business volumes partially offset by lower government reliefs.

Revenue from the Group's **Driving Centre Business** of \$26.3m for 1H2022 was \$0.3m or 1.1% lower than the \$26.6m for 1H2021 following divestment of Nanjing driving school in China in 1H2022. Operating Profit of \$9.0m for 1H2022 was \$1.1m or 10.9% lower than the \$10.1m for 1H2021 mainly due to lower revenues and lower government reliefs.

Revenue from the Group's **Car Rental and Leasing Business** of \$15.2m for 1H2022 was \$2.2m or 16.9% higher than the \$13.0m for 1H2021 mainly due to increased PHV fleet year-on-year. Operating Profit for 1H2022 was unchanged at \$1.7m compared to 1H2021.

Revenue from the Group's **Bus Station Business** of \$4.2m for 1H2022 decreased by \$2.4m or 36.4% from the \$6.6m for 1H2021 due to further lockdowns and travelling restrictions imposed in 1H2022. Operating loss of \$0.3m for 1H2022 compared to an operating profit of \$1.6m for 1H2021 was mainly due to lower revenues.

Statement of Financial Position

The financial position of the Group as at 30 June 2022 remained strong. Total Equity increased by \$1.9m from \$3,136.3m as at 31 December 2021 to \$3,138.2m as at 30 June 2022 due mainly to profit generated for the period, partially offset by foreign exchange translation loss and payment of final dividend for 2021.

Total Assets decreased by \$77.4m to \$4,877.6m as at 30 June 2022 from \$4,955.0m as at 31 December 2021 due to decreases in non-current assets by \$113.0m, partially offset by increases in current assets by \$35.6m. The decrease in non-current assets was mainly due to depreciation of vehicles, premises and equipment. The increase in current assets was due mainly to higher short-term deposits and bank balances, partially offset by lower trade and other receivables.

Total Liabilities decreased by \$79.3m to \$1,739.4m as at 30 June 2022 from \$1,818.7m as at 31 December 2021 due to decreases in non-current liabilities by \$83.8m partially offset by increases in current liabilities by \$4.5m. The decrease in non-current liabilities was mainly due to lower long-term borrowings, lease liabilities from financial institutions, lease liabilities and deferred tax liabilities. The increase in current liabilities was mainly due to higher income tax payable, partially offset by lower trade and other payables.

Cash Flow

The Group recorded a net cash inflow of \$51.4m for 1H2022. As at 30 June 2022, the Group had short-term deposits and bank balances of \$970.5m. After accounting for the borrowings of \$327.1m and lease liabilities from financial institutions of \$40.8m, the Group had a net cash position of \$602.6m. The Group's gross gearing ratio (excluding lease liabilities recognised under SFRS(I) 16) was 11.7% as at 30 June 2022 compared to 12.7% as at 31 December 2021.

3. ANY VARIANCE BETWEEN FORECAST OR PROSPECT STATEMENT PREVIOUSLY DISCLOSED AND THE ACTUAL RESULTS

No forecast or prospect statement has been previously disclosed.

4. GROUP OUTLOOK

The global economic recovery continues as many countries have now relaxed restrictions and are "living with COVID". Accordingly, most Government relief schemes have ended. Barring fresh outbreaks of any new viral strains, and subject to geopolitical conditions, the Group maintains a cautiously optimistic outlook for 2022.

Public Transport Services will continue to be supported by fuel indexation on public bus contracts, although there is uncertainty over the effectiveness of indexation formulas in the long term should high energy prices persist.

Singapore Public Transport Services will also be affected by an amendment to the service fee payable by the LTA on 5 public bus contracts from 1 September 2022 to a rate that is benchmarked against recent bus tenders and is lower than the current service fee, as agreed as part of the transition of the Downtown Line to NRFF 2.

Rail ridership in Singapore, bus charter in Australia and coach services in the UK are continuing to recover after the relaxation of COVID-19 restrictions.

Singapore Taxi revenues are expected to improve and driver earnings are expected to remain healthy as demand for taxi and PHVs in Singapore remains strong. Taxi revenues in China continue to be heavily impacted by the country's "Zero-COVID" policy.

Other business segments are expected to remain stable, with improved activity levels and earnings offset by anticipated inflation and higher fuel and electricity costs.

High inflation rates continue to put margins under increasing pressure across the Group and remain an area of concern. The Group, which is in a net cash position, continues to monitor increasing interest rates while managing borrowings.

With a strong balance sheet, the Group remains committed to its long-term strategy to strengthen its core, transform and build new capabilities in smart and green mobility, while looking for growth opportunities in overseas and adjacent segments.

5. DIVIDEND

Income Statement

1H2022 vs 1H2021

- Revenue ↑\$117.4m or 6.7%
 - Excluding Government relief, Revenue ↑\$119.3m or 6.9% Public Transport Services ↑\$113.6m; Taxi ↓(\$14.5m); Automotive Engineering Services ↑\$16.2m; Inspection & Testing ↑\$4.3m
 - Mainly due to fuel indexation revenues for Public Transport Services, increased fuel selling price for Automotive Engineering Services
 - Includes Government relief of \$9.8m vs 1H2021: \$11.7m, i.e. \downarrow (\$1.9m)
 - Revenue support for charter bus businesses in the UK \$8.1m
 - VAT exemption in China \$1.7m
- Operating Costs 个(\$129.6m) or (9.2%)
 - Excluding Government relief, Total Operating Costs ↑(\$84.1m) or (5.8%) Public Transport Services ↑(\$79.3m); Taxi ↓\$14.8m;
 Automotive Engineering Services ↑(\$16.9m); Inspection & Testing ↑(\$2.2m)
 - Mainly due to higher fuel & electricity expenses for Public Transport Services, higher fuel material costs for Automotive Engineering Services
 - No Government relief in 1H2022 vs 1H2021: \$45.5m, i.e. ↓(\$45.5m)
 - Jobs Support Scheme and waiver of Foreign Worker Levy in Singapore and employee furlough scheme in the UK in 1H2021
 - Singapore \$42.2m, UK \$3.3m

BUSINESS OUTLOOK

Business Outlook

- The global economic recovery continues as many countries have now relaxed restriction and are "living with COVID". Accordingly, most Government relief schemes have ended. Barring fresh outbreaks of any new viral strains, and subject to geopolitical conditions, the Group maintains a cautiously optimistic outlook for 2022.
- Public Transport Services will continue to be supported by fuel indexation on public bus contracts, although there is uncertainty over the effectiveness of indexation formulas in the long term should high energy prices persist.
- Singapore Public Transport Services will also be affected by an amendment to the service fee payable by the LTA on 5 public bus contracts from 1 September 2022 to a rate that is benchmarked against recent bus tenders and is lower than the current service fee, as agreed as part of the transition of the Downtown Line to NRFF 2.
- Rail ridership in Singapore, bus charter in Australia and coach services in the UK are continuing to recover after the relaxation of COVID-19 restrictions.
- Singapore Taxi revenues are expected to improve and driver earnings are expected to remain healthy as demand for taxi and PHVs in Singapore remains strong. Taxi revenues in China continue to be heavily impacted by the country's "Zero-COVID" policy.
- Other business segments are expected to remain stable, with improved activity levels and earnings offset by anticipated inflation and higher fuel and electricity costs.
- High inflation rates continue to put margins under increasing pressure across the Group and remain an area of concern. The Group, which is in a net cash position, continues to monitor increasing interest rates while managing borrowings.
- With a strong balance sheet, the Group remains committed to its long-term strategy to strengthen its core, transform and build new capabilities in smart and green mobility, while looking for growth opportunities in overseas and adjacent segments.

COMFORTDELGRO'S RESULTS FOR HALF-YEAR ENDED 30 JUNE 2022

- Revenue for the first six months increased by 6.7% to \$1.86 billion as the world gradually emerged from the pandemic. Economic activity in all the countries we operate in, except for China, picked up during the last six months, resulting in a growth in demand for our services.
- Group operating profit increased by 30.5% to \$175.6 million.
 - Underlying businesses continued to perform well. Operating profit excluding one-off gains including the sale of Alperton garage in the United Kingdom (UK) and government relief increased by 67.8% or \$51.3 million.
- Net profit attributable to shareholders grew by 30.4% to \$118.7 million, boosted by the one-off exceptional gain.
- Accordingly, an interim dividend of 2.85 cents and a special dividend of 1.41 cents has been declared.

Group

Group revenue for the first six months of 2022 increased by 6.7% to \$1.86 billion as COVID-19 restrictions were relaxed in most countries. Except for China, which continued to pursue its "Zero-COVID" policy and imposed several lockdowns in the first half of the year, economic activity in all of the geographies we operate in improved.

For the half year ended 30 June 2022, the Group registered a net profit attributable to shareholders of \$118.7 million, an increase of 30.4% over the corresponding period last year. This was due largely to a one-off exceptional gain of \$30.5 million from the disposal of the Alperton property in London. Excluding this exceptional gain, net profit was \$88.2 million. As the Company is in a healthy net cash position with stable forecasted cashflows, the Board will return the full net gain from the sale to Shareholders in the form of a special dividend – the first time since 2007 that such a dividend has been declared.

ComfortDelGro Chairman Lim Jit Poh said: "The Group is in a fortunate position to have a strong cash flow and be in a net cash position. As such, we do not have any problem funding our dividend payouts internally. With the exceptional gain from the sale of the Alperton property in London, we have decided to pass on the net gain from that sale to our Shareholders. This is something we will continue to do going forward when we make extraordinary gains and have no urgent need of the proceeds."

On the Group's performance, ComfortDelGro Managing Director/Group CEO Yang Ban Seng said: "As most of the world emerges from the COVID-19 pandemic, demand for the Group's services has continued to grow, save for China which maintains a "Zero-COVID" policy. Our public transport and taxi businesses have, in particular, benefitted from the increased movement of people and uptick in activity levels. But even as pressures from the two-year pandemic subside, new challenges have emerged amidst growing geo-political tensions. We continue to keep a close eye on unfolding events around the world which will have an impact on global economic recovery."

The Group's overseas businesses accounted for 42.6% of total revenue and 47.3% of total operating profit. In particular, the Australian operations registered a strong performance, accounting for 45.5% and 43.3% of total overseas revenue and operating profit respectively.

Operations Review

Public Transport Services

Revenue from the Group's Public Transport Services Business, which comprises bus and rail services, grew by 8.1% to \$1.49 billion due mainly to improved rail ridership and fuel indexation in Singapore. The Group's 50% joint venture, Auckland One Rail, also made its maiden contribution for the half year just ended. Operating profit of \$122.8 million was 48.8% higher mainly due to the increase in revenue and the net gain from the disposal of the Alperton property in London. The increases were however partially offset by higher operating costs resulting from the surge in fuel prices, as well as a reduction in COVID-19 government relief.

Taxi

Revenue from the Group's Taxi Business fell by 6.5% to \$211.3 million for the first half-year due to the various lockdowns in China and the absence of contributions from the London and Ho Chi Minh taxi businesses following their divestments in July 2021 and March 2022. The drop was partially offset by an increase in revenue from the Singapore Taxi business which benefitted from the relaxation of COVID-19 measures, Operating profit was 18.4% higher at \$21.2 million mainly due to the increase in Singapore Taxi business revenue while lower China and UK revenues were partially offset by lower operating costs.

Automotive Engineering Services

Revenue from the Group's Automotive Engineering Services Business increased by 17.1% to \$100.1 million mainly from higher fuel sales. Operating profit was however 16.1% lower at \$4.7 million as fuel sales adjustments lagged oil price increases.

Inspection and Testing Services

Revenue from the Group's Inspection and Testing Services Business increased by 8.6% to \$53.3 million due to a growth in demand for non-vehicle testing services – in tandem with the recovery of the Singapore economy. Operating profit was 8.6% higher at \$16.5 million due to higher business volumes partially offset by a reduction in government relief.

Car Rental and Leasing

Revenue from the Group's Car Rental and Leasing Business rose by 16.9% to \$15.2 million due to the increase in private hire vehicle (PHV) fleet. Operating profit was unchanged at \$1.7 million.

Interim and Special Dividend

For the half year ended 30 June 2022, there was a one-off exceptional gain of \$30.5 million from the disposal of the Alperton property in London which resulted in net profit attributable to shareholders of \$118.7 million. Excluding this exceptional gain, net profit was \$88.2 million. As the Company is in a healthy net cash position with stable forecasted cashflows, it is proposed that the full net gain from that disposal be returned to shareholders in the form of a one-off special dividend.

As such, the following dividends are proposed:

- A tax-exempt one-tier interim dividend of 2.85 cents per ordinary share representing a Dividend Payout Ratio ("DPR") of 70.0% of the underlying net profit of \$88.2 million for the half year just ended; and
- A tax-exempt one-tier special dividend of 1.41 cents per ordinary share representing a DPR of 100.0% of the net gain on disposal of Alperton property in London of \$30.5 million.

The proposed DPR for 1H2022 on underlying profits of 70% is consistent with the DPR for 2021 and is in line with our DPR policy which is to declare a DPR of at least 50%. Pre-COVID, the interim DPR for 2019 was 67%.

Outlook

The global economic recovery continues as many countries have now relaxed restrictions and are "living with COVID". Accordingly, most Government relief schemes have ended. Barring fresh outbreaks of any new viral strains, and subject to geopolitical conditions, the Group maintains a cautiously optimistic outlook for the rest of 2022.

Public Transport Services will continue to be supported by fuel indexation on public bus contracts although there is uncertainty over the effectiveness of the indexation formulas in the long term should high fuel prices persist. Singapore Public Transport Services will also be affected by an amendment to the service payable by the Land Transport Authority on five public bus contracts on 1 September 2022 to a rate that is benchmarked against recent bus tenders and is lower than the current service fee, as part of the agreement in the transition of the Downtown Line to the New Rail Financing Framework (NRFF) 2.

Rail ridership in Singapore, bus charter in Australia and coach services in the UK will continue to recover following the relaxation of COVID-19 measures.

Singapore Taxi revenues are expected to improve and driver earnings are expected to remain healthy as demand for taxi and PHVs in Singapore remain strong. Taxi revenues in China continue to be heavily impacted by the country's "Zero-COVID" policy.

Other business segments are expected to remain stable, with improved activity levels and earnings offset by anticipated inflation and higher fuel and electricity costs.

High inflation rates continue to put margins under increasing pressure across the Group and remain an area of concern. The Group, which is in a net cash position, continues to monitor increasing interest rates while managing borrowings.

With a strong balance sheet, the Group remains committed to its long-term strategy of strengthening its core and transforming and building new capabilities in smart and green mobility, whilst looking for growth opportunities overseas and in adjacent settings.
